Then, does Creative Foreign Air Earbuds support volume control? How does the volume up or volume down to a foreign Air TWS earbud? In this post, you will find out the answer! How to adjust the volume of foreign-air earbuds? Creative Outlander Air TWS earbuds directly support volume control and the operation is quite simple. ●Volume down: Press and hold the left earbud to press the volume. ●Volume up: To increase the volume, press and hold the right earbud. Additionally, you can adjust the volume of synchronization on your iPhone device. However, this feature is not available on your Android phone. The volume of your Android phone won't sync with outliers With Air TWS earbuds. And for Android phones, increase the volume of the right button by pressing and holding your multifunctional button On Outland Air. Music playback / Phone call control on Foreign Air Earbuds ●On Left Ear Bud: Press twice to play the previous track. Press once to play /pause the track. ●Ear bud on the right: Press twice to play the next song. Press once to play /pause the track. ●Both ear buds: press once to answer the call/disconnect. To reject a call, hold and hold it. ● Over 300,000 products ● 20 different categories ● 15 local warehouses ● Multiple top brands ● Global payment methods: Visa, MasterCard, American ● PayPal, Western Union and bank transfer are accepted ● Boleto Bancario via Ebanx (Brazil) ● Unregistered flight mail ● Priority line ● Accelerated shipping ● 45 days money back guarantee ● 365 days free repair guarantee ● 7 day a day Upon arrival warranty (DOA) Great earbuds with excellent sound quality and long-lasting battery life. If you encounter and have problems with the device the customer service team will have 5 stars and will provide all the help you need. I highly recommend creative foreign air-earbuds for anyone. Experience like no other. I have screamers in the gym, but now I can't hear anything even when they're training and exhausting their vocal cords next to their heads. Before I settled into the creative I had tried pretty much everything, but these are the only ones where I feel the bass in my throat, lungs and plexus. They are a legit performance enhancer and great to add groundwork. Don't think about it, just buy them. Incredibly easy. Excellent balance between weight, sound quality and appropriate. Great wireless earbuds, my girlfriend and I love a lot! Tie each one to 17- to 20-year-olds. They're impressed with them. Now I'm going to get it. Excellent. Value for money 7.5 High sound

quality at affordable price. Good value for what the product is – Indeed sweat proof, and washable. Secure suits that it doesn't fall even when sprinting, long jogging and workouts. Battery life is sustainable when the average usage time is above that and it charges quickly; this is not the case when loading. I usually see the need for a fee after 3 days of use, which a day consists of: a morning commute to work (1.5hrs), 30mins at lunchtime, a commute back home (1.5hrs) and about 0.5-1hr while exercising Hand-free features works well and serves almost all average needs and more (Google Assistant) And the lack of a wrinkle really works well for the value and functions of appease each average user who also exercises. Super good sound system! Capable of running without it falling out. Like!! We didn't get anything like that anymore, but there's nothing like it yet, but there's nothing like booking a comfortable fit. Simple setup. Switching from left to right works as advertised. Sound performance is good considering that it is BT earbuds. Keep up the good work. I'll test it on a long flight next! It's amazing. Fits in nicely. I got it a week ahead. Invincible price and excellent performance. Tried some esteemed bluetooth earbuds (Apple & Souz), but they do not come close to both sound quality, fitness and connectivity. Really surprising that it fits nicely into my ears and doesn't fall off after a workout. The only drawback is that it can get a little uncomfortable when you press the buttons on it. Nonetheless, this is not a big problem. I will definitely recommend this product. Surprisingly good. Am very happy to buy. We just ordered another pair! Great earbuds, worth every penny! Creative Outland Air is well priced for real wireless in-ear headphones that offer a crazy long battery life of 30 hours, bright and crisp sound signature, slick design, USB Type-C charging and Bluetooth 5.0. This is the perfect marriage of great audio, technology and price. Like! Excellent fit and great sound! Excellent power for a long time to play. is good. connect and pairing Questions. I bought it. My wife's birthday. He's very happy. He started to love me more now, like newlywed couples. He plays games and enjoys music using this outstanding outlier. Super high quality sound. Comfortable to wear for a long time. Suggest buying. Very happy with the product. The sound quality was better than I expected. The pairing was easy and if you give it a twist to make ear buds a better tight fit, it didn't really interrupt the atmosphere of the noise. The headphone installation was perfect! I'm a lady and find that most headphones or ear buds were too big for my comfort. So it's a big deal for me. The only thing is, I have to use the capsules button. I would prefer a capacitive touch button, but I understand that probably opens the price. Awesome product at a good price! :) I like that!!! The sound is good !! Bass is awesome! Worth it! 😊👍 great earbuds with stable connection and battery life! I read a lot of positive reviews about them so I decided to give them a try. I wasn't disappointed. The sound is phenomenal! Great bass, but not so much that it drowns out the rest of the music and great overall sound. I compared them to a pair of Bose SoundSport Free headphones and the sound was almost identical. There is no app for them, but I don't think they really need one. The match is safe and comfortable. The connection is solid (in a week I've only had 1 or 2 drops and I've been using them every day for at least an hour). The only downside is that the buttons are a little rigid to press. It's not impossible, but you have to press them so that the pressure doesn't push them beyond the ear. It's more of a learning curve on how best to press buttons. Maybe more 4.5 star to watch, but sound more than make up for it. 🇬🇧The staff is very friendly and about the staff. It sticks to your headphones like a glove. Easy to use and seems really durable in all kinds of sports. a great sounding pair of wireless ear buds @ a really good price. Great stuff!!! Buys more family soon just become Outland with Airs, charged them up, paired them with my LG V30, a simple, simple process. Fired by Bryan Ferry's Boys and Girls Hi-Fi quality tides. Wow. I know this album goes back decades. Hearing things I've never heard of: a detailed, clearly defined, spacious sound landscape. Very musical. Initiating scheduling. Breathtaking. Rich, saturated but tame bass. Resonant. Sounds exactly the way I want it; something missing. No hearing loss. Very pleased. I buy them after doing intensive research on a lot of TWS available on the market. Originally I was leaning towards the Jabra elite, but I found a review that mentioned them as a bluetooth aptx codec that caused me to then divert my attention to them. I stopped buying them and 1MORE stylish (one for me and the other for my gf) because they both support aptx. Here's a quick comparison: Sound: the sound features of both their TWS are amazing but different. Ads are bass hard, but don't sacrifice mids/highs so vocal very clear. The thing that impresses me the most is the sound stage. Ads have a very open sound stage, creating an immersive 3-dimensional sound in the ear. These TWS can be very loud ... I like to breed out loud. 1MOREs on the other hand offers more balance between sound and volume not so loud. 100% volume of 1MORE is about 85-90% of creations. The outlier air is better suited to me based on the type of music I listen to. Fit/Features/Connectivity: So fit, creations stay in my ear much better, where like 1mores do when I shake my head violently. Also, creative foreign air is better at passive noise suppression because it blocks most of the ambient noise. There are a few areas of creative can improve this product. First, the buttons are very hard to press compared to 1Mores and therefore I had to set the volume to max and dial back the volume using my phone. Secondly, the connectivity of these earbuds could be better. I did a test where I walked about 50 feet at work and it held a pretty good connection when there are no walls obstructing the road. At the moment, there's any impediment, I'd say the sound starts to cut in and out about 30 feet. Therefore, the actual stable connection range is about 15-20 feet. 1More Stylish did a better job of having a very good connection at the same distance. Finally, there's latency. I hope to see bluetooth aptx low latency codec in the future. Both products show little or no lag when watching videos on my phone. However, when playing, or when watching videos on my computer I notice a very small delay and a video/audio sync issue. I even installed a bluetooth 5.0 wireless card on my laptop to see if it helps with a slight delay. Unfortunately, it didn't. Regardless, latency is actually really good because I tried really hard to find audio/video sync issues. This happens on both devices. In general, I love this product regardless of some nitpicked disadvantages, because the sound coming from them is just that good and so good price point. I have recommended this product to several friends and colleagues at work. I actually feel compelled to write a review of this- Nice product!. The first thing you need is that when you get them is to put new ear tips on them! I start by saying that I would have given the product 2 star a look if I didn't have some decent ear tips for another pair of buds to test them out. With added hints of fit and seal was missing and uncomfortable. Very thin. I replaced the pair I had some beaks in my ears and the difference between bass and seal is the magnitude better. Dramatic, maybe. But there was a difference. I let my wife try and she was even surprised by the difference. Bass extension was great. Unfortunately, the depth does not allow them to sit in the event and charge properly so I have some advice on that and trying to change. So, Creative, excellent Do yourself a favor and charge \$5 more and add some nice ear tips. With that out of the way - Nice packaging and presentation. I wish you could tie more than one device, but I knew it wouldn't go in. There are some similar looking products on Amazon, but they seem to have better specs. Overall, I like the design and agree with a lot of the comments I've seen regarding the buttons, a little hard to press. The sound quality is very comparable to the beads in the ears I have. There's more bass extension and warmth to the sound. I think the detail is decent and with my use of them they sound pretty good. I didn't want to spend a ton and I have other noise-cancelling headphones to travel with. I've tried to use these few calls, which was basically my wife calling me- ok, but really not a hard test because it was quiet and we were all in the room from each other. I have not yet experienced any other issues I have seen regarding dropouts so on. I hope that the SXFI application will support them soon, which would be a great and additional bonus. Commendable work on phones and a little fine-tuning they could be superlative. I think if you're looking for a good workout kit that doesn't break the bank and sound pretty good with the right tips, these are for you as they are for me. I seriously can't believe how amazing these buds sound..... I've listened to them for several hours and they are awesome. I hear new details about old favorites and the sound is so rich and full of great seceding and sound stage. These would be a great £200, but £75? Wow! Don't think twice..... reviews are true .... Brilliant. I watched and read all the comments online before pulling the trigger on this one. I have to say I was completely floored and blown away by how great and amazing this product is. all reviews you can find online are on site. I highly recommend it to those looking for a whole, well balanced and excellent value for a true wireless audio experience. and BTW, delivery was sonic fast literally. delivered within a week of my shopping day (I live in Singapore) Thank you creative team. keep the good work very good sound quality and good matches Truly amazing quality. By far my best purchase in a very long time. Sound quality, durability and overall design are sensational. A real goosbump feeling when you open the box. The best earbuds I've bought so far. I have had several other wired and wireless bluetooth headphones over the years. Creative Outland Air is better than others, especially given the long battery life and charging case. I've been able to wear them for an hour or two, about 6 days a week, 2 weeks before charging the case/earbuds. None of the other Bluetooth headphones that I've owned are even nearby. The sound is great, from highs to lows. I've listened to some songs that I've known for years and now appreciate the lyrics and sound better through Earbuds. Easy to use and pair easily with my Android phone. Definitely worth the investment! The sound quality is fantastic. You can have the same quality of big brands as Bose, wins, but £75 of this earbuds are very cheap. I think Creative is one of the largest brands in the world when it's about quality standards. Keep it at 4 best on the market. I am used to pressing physical buttons. Removed star because there is no companion app on the device. Please make one creative. You can't go anywhere without them! These headphones are still strong after 3 months. I've noticed some community issues a few times here and there, but these are the best headphones for both quality and budget. Can't wait to buy a gold pair I wish more people knew they got 2 days after I bought it, have been trying out for a while and I have to say getting into a true wireless budget was tough because I don't know what I picked up and I found it, went to research this product and finally make a switch to buy. When I got it, and after charging, I really can't say that these sound AMAZING and that's compared to me, who has a high taste in music, vocals and highs are really good and the lows aren't too overbearing either. as other people have said where the button is hard to press, I agree that it must either go to a capacitance or easier to press the button, but I do not mind this small error over how great the rest of its features are. The other thing I tested was in the range and it's not bad, especially when I'm in a room full of electronics and computers around me it gets over through 10m of what specs had said. Generally, if there is the next gen foreign air, what I want to see them are: 1. Softer buttons / Capacitive Touch. 2. Ear ends in sizes range from small to large. (although small fits me completely small and medium does not fit other people) 3. Enable app support similar to how Outlier Gold is having. I hope this review will allow other people to know what are the pros and cons and can find the right true wireless earbuds for them. Awesome sound and battery life Excellent product! that's why I bought my dad one too! Well-functioning earbuds with adequate connectivity and a long-lasting battery life. Battery.
